TECHNOLOGIES

Languages & Databases: JavaScript (ES6+), TypeScript, PostgreSQL.

Frameworks & Libraries: React, Bootstrap, Bulma, Express.js, Knex.js, Node.js, Framer-motion, [Next.js](#), Tailwind CSS, Hono

Tools & Testing: Git, Excel, Codex.

SOFTWARE PROJECTS

Dexnav-Pokedex | [Github](#) | [Website](#)

New York, NY | Mar 2026

Find your favorite Pokemon!

- Built using HTML, CSS, Typescript-React and framer-motion to create clean, Y2K-inspired visuals and animations.
- Implemented dynamic data pipelines using PokéAPI to support search, filtering by type and generation, navigation across 1000+ Pokémon.
- Engineered evolution chain traversal and variant handling by leveraging pokemon-species relationships and recursive data parsing.
- Developed a favorites system with localStorage persistence, enabling users to save and revisit personalized selections.
- Designed a carousel-based navigation system with synchronized state management to dynamically rebuild Pokémon lists based on user interactions.

SOFTWARE ENGINEERING EXPERIENCE

Software Engineering Freelance

New York, NY | Jun 2026-Present

Kashika's Event-Space

- Built a full-stack event-space booking platform for Kashika's using React, TypeScript, Hono, Cloudflare Workers, Cloudflare Pages, and Cloudflare D1.
- Developed a serverless backend API with Cloudflare Workers and Hono to handle booking creation, availability checks, admin booking management, and blocked-date logic.
- Designed and implemented the booking data model with Cloudflare D1, including customer details, event dates, event types, payment methods, guest counts, booking statuses, timestamps, migrations, and seed data.
- Built a responsive, polished frontend across key pages with Framer Motion animations, carousel behavior, gallery modals, hamburger navigation, and clean admin/table-style booking management views.

UX/UI Designer | [Figma](#) | [Website](#)

Prometheus

New York, NY | Oct 2025-Dec 2025

- Led a full UI/UX redesign for We W.I.L.L. Thru Sports, creating a modern, playful interface in Figma that increased clarity for parents and improved the donation flow.
- Conducted stakeholder interviews and user research to define the user journey, delivering an optimized site map that reduced navigation complexity
- Produced research-driven low and high fidelity wireframes, aligning design decisions with qualitative insights to elevate brand storytelling and user engagement.

Software Developer Intern

Prometheus

New York, NY | May 2025 - July 2025

- Collaborated in a team of 15+ in creating a website for Black Girls Smile Organization, ensuring cohesive functionality throughout the Home and Survey pages.
- Ensured for general and mobile responsiveness, utilizing tool stack tailwind CSS, React and Next.js.

PROGRAMS

Google Software Engineering Program (GSWEP) | Fellow

New York, NY | Jun 2026 - Present

- Selected from a competitive applicant pool to work 1:1 with Google Software Engineers, solving technical problem weekly to build foundations in Data Structures and Algorithms in Python and JavaScript
- Participated in career day at Google's NYC headquarters to learn more about SWE tools and technologies

EDUCATION

Software Engineering Fellowship - The Marcy Lab School

Brooklyn, NY | Mar 2024 - Feb 2025

- Completing 2,000 hours of coursework in web development, CS fundamentals, and leadership development
- Developing proficiency in HTML/CSS, JavaScript, NodeJS, ReactJS, SQL, and AWS

SKILLS

Spoken Languages: English (Native), Spanish (Intermediate)

Passions/Hobbies: Drawing, Reading, Hiking, Writing
